

## **Tributary Releases Storage Director 4.0 At SHARE IBM Mainframe Expo**

### ***Adds 8Gbps Fibre Channel and NPIV Virtual Front-End Ports***

SHARE, Anaheim, Aug 6, 2012 – [Tributary Systems, Inc.](#) is releasing **Storage Director 4.0** with enhanced connectivity and security features at SHARE this week. Tributary is an [IBM OEM, Solutions Integrator and z Development Partner](#).

**Version 4.0 of Storage Director®** enables 8Gbps Fibre Channel connectivity and adds support for the NPIV facility that allows multiple virtual devices to utilize a single physical port. Among new security features, 4.0 adds several levels and methods of password security to better protect stored data.

Tributary Systems is discussing Storage Director 4.0 and its unified backup capabilities in **Booth 224 at the SHARE IBM Mainframe User Group Expo** in Anaheim through August 8th.

“Storage Director is a robust virtual backup solution for all IBM ® platforms, and v4.0 adds new capabilities and enhancements,” said Ed Ahl, Director of Business Development for Tributary Systems, Inc. “The total solution includes Storage Director software on IBM x Servers, with IBM disk and tape technology, and IBM hardware support. With Storage Director, zOS customers can unify their backup infrastructure, sharing backup/DR resources among all the environments running in their data centers.”

Tributary Systems, Inc. ([www.tributary.com](http://www.tributary.com)) delivers data protection with vision. Customers include *Fortune 20*, *Fortune 500* and *Fortune Global 1000* companies as well as small and middle market companies in banking, financial services, retail, telecommunications and healthcare.
