

Tributary Direct Connects HP StoreOnce and HP NonStop

At HP Discover, Tributary Announces Only Native Attachment Of HP StoreOnce D2D De-Dupe To HP Nonstop

Las Vegas, HP Discover 2012, June 4, 2012 – Tributary Systems announced today the native attachment of the HP StoreOnce D2D De-duplication solution to HP NonStop Systems. Tributary CEO Shawn Sabanayagam said at HP Discover in Las Vegas: “Now enterprises running mission critical applications on HP NonStop systems can take advantage of the improved deduplication efficiency and reduced bandwidth requirements provided by the HP StoreOnce D2D VTL and De-duplication Backup System.”

Only [Tributary Systems](#), Inc., an HP OEM storage supplier for 16 years, can provide a native attachment to the HP StoreOnce D2D backup systems to enterprises relying on HP NonStop systems, by using Tributary’s LMM (Library Media Manager) backup/media management application. LMM makes the HP StoreOnce D2D VTL and de-duplication appliance look to the HP NonStop like an HP MSL or HP EML tape library. Tributary’s SMM / LMM media management software application, the only backup/media management application in existence today for HP NonStop servers, has been supplied to HP’s NonStop Enterprise Division since 1997 under an OEM agreement.

Tributary’s Storage Director/ViTAL® solution enables HP StoreOnce attachment to other host platforms, including other HP systems (HP-UX, OpenVMS, Linux®), IBM® Power Systems™ (running IBM i up to v7.1, AIX® or Linux) and open systems (Windows®, Linux, UNIX).

HP StoreOnce Backup Systems feature a federated deduplication engine that enables moving data across various systems without rehydrating the data, thereby improving deduplication efficiency and reducing the required data bandwidth. Designed for enterprises, the HP StoreOnce Backup System has backup storage capacity from 2TB to 768TB, and speeds of up to 28 TB/hr.

Visit Tributary Systems in Booth 422 at HP Discover 2012 in Las Vegas at The Venetian.

[Tributary Systems](#) develops, sells and supports unified backup storage, remote replication and disaster recovery solutions. Tributary has been an OEM supplier to HP for 16 years. Tributary customers include enterprises in the *Fortune 20*, *Fortune 500* and *Fortune Global 1000* as well as SMB companies in banking, financial services, retail, telecommunications and healthcare.
